Art Unit: 1712

Based on an indication of allowable subject matter in claim 5, Applicant has amended the base claim to include the subject matter recited in claim 5. It is now appreciated that the Examiner erred by stating that claim 5 was not rendered obvious by the combination set out previously. Any inconvenience to Applicant is sincerely regretted.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-3, 6-9, and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Haselhorst et al., U.S. patent # 6,300,455 in view of Hatanaka et al., U.S. Patent # 4,329,275. Based on the structure of the compounds corresponding to component (B) that are outlined in column 3, lines 8-10, it is now the position of the Examiner that the newly added limitation, i.e. that of original claim 5, is inherently satisfied.

Section 2112.01 of the MPEP emphasizes that, "When the PTO shows a sound basis for believing that the products of the applicant and the prior art are the same, the applicant has the burden of showing that they are not." *In re Spada*, 911 F.2d 705, 709, 15 USPQ2d 1655, 1658 (Fed. Cir. 1990). "Whether the rejection is based on inherency under 35 U.S.C. 102, on prima facie obviousness' under 35 U.S.C. 103, jointly or alternatively, the burden of proof is the same...[footnote omitted]." The burden of proof is

similar to that required with respect to product-by-process claims. *In re Fitzgerald*, 619 F. 2d 67, 70, 205 USPQ 594, 596 (CCPA 1980) (quoting *In re Best*, 562 F.2d 1252, 1255, 195 USPQ 430, 433-34 (CCPA 1977)). However, "A prima facie case can be rebutted by evidence showing that the prior art products do not necessarily possess the characteristics of the claimed product." *In re Best*, 562 F.2d at 1255, 195 USPQ at 433.

Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Haselhorst et al., U.S. patent # 6,300,455 and Hatanaka et al., U.S. Patent # 4,329,275 as applied to claims 1-3, 6-9, and 12 and further in view of a formula taken from *Silicones, An Introduction to Their Chemistry and Applications* authored by Freeman that relates polymer chain length and viscosity and the definitions of dynamic and kinematic viscosity delineated by *Hawley's Condensed Chemical Dictionary* for the same reason provided previously.

#### ***Allowable Subject Matter***

Claims 10 and 11 remain objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
